SMALL VOLUME SALES WORKSHEET

SMALL VOLUME SALES: Seedlings are on display. Color coding of information sheets: GREEN – Reforestation. PINK – Christmas Trees. BLUE – Wildland, Wildlife Plantings. YELLOW – Landscaping. Select the seedlings you desire from those on display. Use a pencil to mark the labels to help you identify your selections when you get home. Make a note on this worksheet of the quantity that you have selected of each item. This will speed check out. If you have questions, need help, or require larger volumes please ask one of the sales representatives.

FULL BAG AMOUNTS: For some species and stock types we have full bags available for sales, these are marked with “*”. We may have other seed zones and stock types available. There are price breaks for buying in full bags. Bag volumes vary by species and stock type. Please see the separate worksheet for Bag Volume Sales.

LIMITED QUANTITIES: Demand for seedlings has been great. The extremely rainy weather has prevented us from lifting all stock at this time. The stock we are selling has been set aside specifically for this advertised sale. These sales are designed for customers not meeting our order minimum. For fairness we may place a limit on sales quantities until all customers have received some seedlings. Any seedling remaining after the sale will be available Monday through Friday, 8:30 a.m. to 4:00 p.m. in full bag or box amounts only. Please call the nursery before coming to purchase to ensure availability.

EXPRESS CHECKOUT: For purchase of individual items (No bag quantities). You will NOT receive an itemized receipt. Please complete the worksheet. If you want a record of what you purchased you will need to fill out a second worksheet.

Seedlings \$.75 each. Record the number of seedlings for each item to speed checkout.
